

# Regulatory Support

## Regulation

- > Regulation is a tool used to bring about change on an ever more frequent basis;
- > However, for regulation to be effective, sound processes must be applied in its development, consultation and implementation:
  - > Rushed or ill-prepared regulation often results in an ineffective and costly legacy.
- > Mileridge has spent many years supporting the development of pan-European regulation:
  - > Including European regulation on behalf of the European Commission.

## Our Experience

- > Extensive involvement in all aspects of regulatory development, including:
  - > Drafting of European and national regulation;
  - > Impact assessment;
  - > Support to consultation processes;
  - > Development of suitable means of compliance;
  - > Conformity assessment;
  - > Implementation support to Stakeholders.
- > Support to international, regional and national authorities;
- > Support to both the auditee and auditor during assessments of compliance.

## Services Offered

- > Regulatory drafting and process advice;
- > Preliminary and extended impact assessment;
- > Safety assessment;
- > Civil/Military co-ordination analysis;
- > Interoperability analyses in specific domains;
- > Consultation response analysis and production of Summary of Responses documents;
- > Specification drafting and compliance monitoring;
- > Support to stakeholder implementation;
- > Support to certification;
- > Training of personnel involved;
- > Project management and oversight.

## Benefits Gained

- > Truly independent "one stop shop" covering all aspects of regulatory development;
- > Help to ensure that your resources are employed in a cost-effective manner;
- > Access to genuine expertise and experience that enables effective through-life project support.
